## Foundation at the Vienna Design Week

by Jet van Zwieten

Foundation is about collecting waste material and old furniture from the neighborhood, moving it to a waste container, reusing it to turn it into a small pavilion (with the container as the foundation), to become a temporary meeting place.

For the last two days we've been looking for materials in the 17th district of Vienna. The container is well filled now and we're ready to start building...

### Call for contributions!

Anyone with waste material or tips for the project: Don't hesitate to visit us at metrostop Alser Straße!

Hunting for materials in the Hernals district
